Help Out “Haz” Matt!

I work for the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia. You learned about the place where I work when you read *The Mystery of Thunderbolt Fort*. My name is Matt, but my nickname is “HAZMAT.”

HAZMAT is short for “hazardous materials.” Hazardous materials can be chemicals, gas, germs, or anything else that harms humans. I wear a biohazard suit to protect myself! Nothing can get through it!

“Haz” Matt has checked out the following items while wearing his biohazard suit. Help him complete the list by indicating if each item helps or harms people.

	HELP	HARM
FLU VACCINE	<input type="checkbox"/>	<input type="checkbox"/>
VEGETABLES	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/> MEDICINE	<input type="checkbox"/>	<input type="checkbox"/>
TOXIC CHEMICALS	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/> POISONOUS GAS	<input type="checkbox"/>	<input type="checkbox"/>
EBOLA VIRUS	<input type="checkbox"/>	<input type="checkbox"/>
HEALTHY FOOD	<input type="checkbox"/>	<input type="checkbox"/>
<input checked="" type="checkbox"/> RADIOACTIVE MATERIAL	<input type="checkbox"/>	<input type="checkbox"/>
CLEAN WATER	<input type="checkbox"/>	<input type="checkbox"/>
SMALLPOX	<input type="checkbox"/>	<input type="checkbox"/>

LIGHTING THE WAY!

The Mystery of Thunderbolt Fort takes place on the Georgia coast. Tybee Island is a barrier island off the coast of Georgia. A lighthouse stands on Tybee Island, built after the third lighthouse was partly destroyed in 1862. Confederate troops from Fort Pulaski set fire to the tower so that Union troops could not use it to guide their ships into port!

Color the Tybee Island lighthouse and the light station.

Viruses are Virulent (Powerful!)

In *The Mystery of Thunderbolt Fort*, ebola is said to be a very serious disease. Ebola is caused by a virus. Viruses are the smallest of the microbes. They cause other diseases you may have heard of like the flu, yellow fever, polio, and smallpox.

To survive, viruses have to take over other living cells. This is why they are such a problem—you have to kill the cells they have invaded in order to kill the virus.

Fill in the acrostic below to describe the power of a virus! One letter has been done for you.
