The Mission Possible Mystery at Space Center Houston

Bring It To Life!

1. Use empty paper towel rolls to make a rocket. Use construction paper and other materials to make it look authentic. Decorate it with markers and stickers. Don't forget to name your rocket!
2. You are an astronaut. Research the solar system and choose your favorite planet (*other than Earth!*) to explore. Plan your mission on a piece of poster board to show to your friends.
3. Visit www.nasa.gov and research the heroes of the space race. Who is your favorite hero and why? Glue a picture of this person on a piece of poster board and list facts about his or her contributions to the space race.
4. You and your friends are the first group to live on the moon. Work together to plan and draw a picture of your colony. Remember to include where you sleep, eat, and relax!
5. You are the first kid chosen to ride the space shuttle into space. Write a story about what you saw, heard and felt.
