## The Earthshaking Earthquake Mystery

### Bring It To Life!

1. Make an Earthquake Survival Kit! You learned about things that you might need in this mystery. Collect the proper items and get a secure box or container for them. Be sure to mark your box properly and put it in a safe place.

2. The earthquake ride at Universal Studios was both scary and exciting for the Masters kids because it was so realistic! Would you like to experience the earthquake ride? Think of some additions to the earthquake ride and share them with the group.

3. Take a piece of construction paper and tear it in two uneven pieces. Slowly slide the two pieces of paper back together. Do not try to fit the pieces together like a puzzle, just get close enough to doing so that the pieces of paper push up against each other or overlap. This is a great illustration of how the shifting of tectonic plates can form valleys and mountains after earthquakes!

4. You can be a Junior Ranger! Go with your friends to forests, parks, streams, even your school's sports fields and pick up trash and plant trees or flowers! Don't forget to make yourself some official nametags and Junior Ranger patches!
