

meet Jawsie!

Learn about the parts of a shark below. After you have finished, use your crayons to color Jawsie! Then, read the tips below Jawsie on how you can find shark teeth!

Tips to Find Shark Teeth

- Look in a section of the beach where you see more blackish things than shells. Look carefully, and pick up anything black. Works best at low tide!
- Look at the water's edge where shells and rocks are being pulled back to the ocean. If you think you see a shark tooth, grab it and all the shells around it, because it's hard to catch!
