The Antarctica Mystery

Fascinating Facts

Antarctica

- It rarely snows in Antarctica. In fact, the continent only gets about one to two inches of snow a year!
- If the ice on Antarctica melted, all the oceans on earth would rise almost 200 feet. That'd make a really wet world!
- The South Pole stays dark for six months in the winter. There is constant daylight for six months in the summer!
- Antarctica is the driest, windiest, and coldest place on earth.
- You won't find any trees or bushes in Antarctica!
- The average summer temperature on the South Pole is around -35 degrees Fahrenheit. BRRRR, that's cold!
- Only 2% of Antarctica's land is not covered with ice.
- The center of Antarctica is the largest desert in the world. It's a cold one, too!
- To protect the seals, no dogs are allowed on Antarctica.
