Global Adventures & Languages

It's Your World

This series gives students the opportunity to "travel" around the world and learn about other amazing countries and continents. It's Your World brings these exciting places to life through food, culture, history, and famous people. From fascinating cultures to dramatic geography, this series gives students a breadth and depth of knowledge about incredible places across the globe.

The Amazing History of Mexico!

Mexico's history dates all the way back to 6,000 B.C.E. That's ancient! One of the most important eras in Mexico's history was that of the Incas. The Olmec were artists. They created the "colossal heads" - huge human heads carved out of stone.

The Mayan people lived during Mexico's Classical Period from 250 - 900 C.E. One of the Mayans took amazing contributions to the history of Mexico was a fully developed writing language. It was the first of its kind in the Americas! Some wonderful examples of Mayan architecture are the many pyramids and religious centers that still exist today.

The most well-known early civilization in Mexico is the Aztec. By the 1400s, the Aztecs had built one of the most advanced societies in all of the Americas! The Aztecs constructed high temples and palaces to show their devotion to their gods. The Spaniards destroyed the Aztec Empire when they conquered it in 1519.

Today, Mexico struggles with poverty, corruption, and health care - and other problems. In spite of that, it remains a vibrant and fascinating country!

Timeline!
Sketch these events in the order that they took place from top to bottom:

- Spaniards conquer the Aztecs
- Origins of Mexican history
- Mayan Classical Period
- Advanced Aztec civilization
- Olmec settlements are established
