The 21st Century Tech Tools series brings tech literacy into the classroom with attention-grabbing activities that encourage kids to think critically, solve real-world problems, create, and collaborate. Each Tech Tools book includes 20 lesson plans teachers can use with ease, covering cross-curricular concepts with the help of some of today's favorite devices. Whether kids are using technology to explore global time zones, create a news story, or describe music, they are always building important skills for the future.

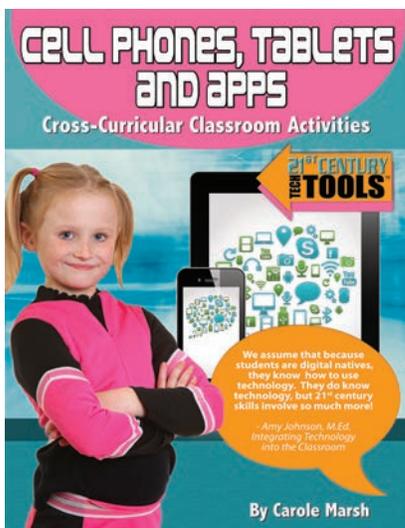

Blogs and Vlogs

Class activities incorporate curriculum content into 21st century writing and speaking skills. Students can explore publishing, editing, and recording both written and video projects, while learning Internet research skills and the impact of current events, as well as topics from history, geography, and science. Writing types covered include opinion pieces, explanatory texts, and narratives.
