

ALL-IN-ONE!

Conservation

Elementary Teacher Instructions and Activity

Students will list a conservation tip, a recycling idea, a reduce tip/idea, or a reuse tip/idea on a reproducible sheet.

Supplies needed: pencil, crayons or colored pencils, reproducible page

Directions:

1. Ask students to pick a conservation tip, a recycling idea, a reduce-use idea, or a reuse idea. They can get ideas from the bulletin board pieces or come up with their own idea.
2. Pass out the reproducible sheet.
3. Ask students to write their tip or idea on the reproducible sheet, then color and decorate the sheet.
4. Have students present their tip to the class and hang their sheets on the bulletin board.

Go the extra mile!

Get your class involved in a recycling project! Collect cans, recycle them, and buy something for the classroom or school with the money collected. Choose a class photographer to take pictures of the project and display them on the bulletin board!
